Geriatric Ambulatory Care Clinic

The Geriatric Ambulatory Care/Memory Disability Clinic sees mostly seniors (65 and over) with health problems related to frailty or dementia. A request needs to be sent by your primary care provider, as consultations are on a referral basis only.

Location

The Clinic is on the 1st floor of the Veterans' Memorial Building (VMB), on the corner of Robie Street and Veterans' Memorial Lane (formerly part of Jubilee Road) next to the Abbie J. Lane Memorial Building and the Halifax Infirmary.

What to bring

Please bring your medications or a complete list of your medications. It is best to bring all your medications with you in their original packaging.

In order to assess you, we must almost always interview someone who knows you well. **Please bring a family member or close friend with you.**

What to expect

Visits usually last between 1-3 hours. Depending on the reason for your visit, you may see a registered nurse (RN) and a doctor (geriatrician or neurologist), or you may only see an RN and/or nurse practitioner. You may also see a medical resident, a pharmacist, or other learners, such as medical students or nurses.

You will be interviewed by Clinic staff, have your vital signs taken, and have a physical exam. We will ask to review your medications. We will also ask to interview someone who knows you well, most often the person you bring to the appointment with you.

At the end of your appointment, we will explain to you what we think the issues are and our recommendations for treatment, and recommend helpful community resources (if possible). Depending on the results of the assessment, we may refer you for tests or to see other specialists. We may also ask you to come for a followup appointment.
