After Minor Oral Surgery

This is a guide to help with your care at home.

The name of your surgery is

Discomfort

Take medication as prescribed by your doctor.

Do not drink alcohol while taking pain pills.

Activity

When you get home, lie down with 2 pillows under your head. You may feel sleepy and light-headed.

Mouth care

Start rinsing your mouth the morning after your surgery. Use a small pinch of salt in a glass of warm water. Rinse several times a day. Be sure to rinse after meals and at bedtime.

To control bleeding

Some oozing and discoloration of saliva is normal. If bleeding continues, hold gauze in place for 30 minutes to 1 hour with constant firm pressure. If the bleeding does not stop, call your doctor.

- Do not suck or spit.
- Do not use a straw when drinking.
- Do not smoke.
- Do not disturb the wound. This may start an infection, irritation and/or bleeding.

To control swelling

Swelling is normal. It may go up until the 3rd day after surgery and then it will start to go down.

- For the first 24 hours, use ice packs, alternating 20 minutes on, then 20 minutes off. Do not use ice packs after the day of surgery.
- The day after surgery, use warm, moist heat on the area. A hot water bottle or warm, moist towel can be used until the swelling and stiffness go away.

Food

Only drink cold fluids on the day of surgery, for example: ice cream, Jell-O®, eggnog, milkshakes. Then eat warm soups and very soft foods for the next couple of days.

Stitches

The stitches in your mouth will dissolve on their own and fall out.
