<div style="display: flex; align-items: center; margin-bottom: 10px;">  <input type="checkbox"/> My morning medications </div> <div style="display: flex; align-items: center; margin-bottom: 10px;">  <input type="checkbox"/> My midday medications </div> <div style="display: flex; align-items: center;">  <input type="checkbox"/> My evening medications </div>	Notes: _____ _____ _____ _____ _____	
 While I was in the hospital I received:		
Flu vaccine <input type="checkbox"/> Yes <input type="checkbox"/> Not applicable	COVID vaccine <input type="checkbox"/> Yes <input type="checkbox"/> Not applicable	Pneumonia vaccine <input type="checkbox"/> Yes <input type="checkbox"/> Not applicable
<input type="checkbox"/> After I go home, I will talk to my primary health care provider or to my pharmacist about keeping my vaccines up to date.		

Care at home

- Most people feel better after 3 to 5 days. You may still feel tired. You may have a mild cough for 30 days (1 month) or longer.
- Use the incentive spirometer you were given, as shown by your health care provider.
- Keep taking any antibiotics as prescribed.
- You may feel more tired as you get better. Rest more often than you are used to.

Home care

- ☐ I have Continuing Care set up for when I go home.
- For more information:
 - › Phone (toll-free): 1-800-225-7225
- Scan the QR code or visit:
 - › www.nshealth.ca/continuing-care

Equipment

- ☐ I have been approved for equipment funding.
- ☐ I have a prescription for equipment from an occupational therapist.

Canadian Red Cross – Health Equipment Loans

- › Phone: 902-423-3680
- › www.redcross.ca/in-your-community/nova-scotia/health-equipment-loans

Eating and drinking

- Drink plenty of fluids unless your health care provider says not to. This will help you stay hydrated.
- If you are not as hungry as usual, eat smaller meals more often.
- ☐ You can go back to your usual eating habits right away.
- ☐ I will follow the eating guidelines I was given by my health care team for _____ days/weeks/months.

Prevent infection

- **The best way to prevent the spread of infection is to wash your hands often with soap and water or use alcohol-based hand rub.**
- Stay home until you are well.
- Wear a face mask in public places.
- Try to avoid others who are sick.
- Keep your vaccines up to date.

Smoking

- **The best thing you can do for your health is to stop smoking and/or vaping.**
- When you are ready to quit, call 811 for information about resources to help you quit.

Sex

- If you have questions about going back to having sex, talk with your health care provider.

Mental health

- Practice habits to help your mental health (like lowering anxiety and stress) during and after your recovery. For ideas, scan the QR code or visit:
› <https://mha.nshealth.ca>

If you are having trouble with your mental health, or alcohol or drug use:

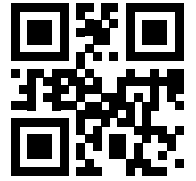

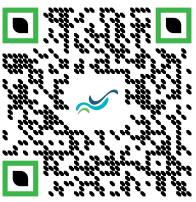

- Mental Health and Addictions Services Intake Service
› Phone (toll-free): 1-855-922-1122
- **If it is an emergency, call 911 or go to the nearest emergency department right away.**
