

NEED A FAMILY PRACTICE REGISTRY

Data Summary: July 1, 2018

Prepared for: NSHA Reports, Statistics and Accountability

INTRODUCTION

Nova Scotia Health Authority’s Need a Family Practice registry was launched on November 1, 2016. The registry provides a coordinated and consistent provincial approach for tracking Nova Scotians who self-identify as not having access to a primary care provider (family doctor or nurse practitioner). People can register themselves and their family members online at needafamilypractice@nshealth.ca or by phone through 811.

The data below report on all registrants since November 2016. They fall into two categories: those not yet placed, and those who have found a primary care provider. Once a registrant is identified to have found a primary care provider, their information is removed from the total number of registrants not yet placed.

	
<p>NOT YET PLACED</p> <p>Registrants who have submitted a request to have their name placed on the provincial NFP registry and have not yet been placed with a practice.</p>	<p>FOUND A PRIMARY CARE PROVIDER</p> <p>Registrants who have found a primary care provider either through</p> <ul style="list-style-type: none"> (a) Providers/practices confirm people as accepted via a list provided through the NFP registry <p style="text-align: center;">OR</p> <ul style="list-style-type: none"> (b) Registrants indicate they have found a primary care provider when contacted or when updating their information in the registry

WHAT THE NEED A FAMILY PRACTICE REGISTRY DOES AND DOES NOT DO

The registry allows us, for the first time, to establish provincial data on how many Nova Scotians do not have regular access to primary care and where they are located. That enables us to plan and prioritize work to expand and enhance collaborative family practice teams around the province. The registry acts as a mechanism to track individuals who self-identify they cannot find a family practice and, therefore, is not a strategy that improves access to primary care.

We recognize that the Need a Family Practice registry does not capture every Nova Scotian without access to a primary care provider: not everyone is aware of the registry, and others are not actively seeking a primary care provider.

The registry is also a resource that allows us to provide family doctors and nurse practitioners who are accepting new patients with a list of people in need in their area, according to their date of registration. The College of Physicians and Surgeons of Nova Scotia *Professional Guidelines and Standards Regarding Accepting New Patients* identifies a first come, first serve approach. Primary care providers are not required to accept patients from this list.

OVERALL HIGHLIGHTS – AS OF JUNE 1, 2018

TOTAL NUMBER OF REGISTRANTS WITHOUT A FAMILY PRACTICE

- 52,507 registrants not yet placed with a family practice
- This is 5.7% of the total population in Nova Scotia, based on 2011 census data.

TOTAL NUMBER OF REGISTRANTS WHO HAVE FOUND A PRIMARY CARE PROVIDER

- 16,532 people have found a primary care provider as tracked through the registry since its launch in November 2016.
- This data is *not* included in the 52,507 volumes.
- Of these, 1,315 people found a primary care provider over the past month.

TOTAL VOLUMES - MONTHLY REGISTRY ACTIVITY BETWEEN JUNE 1, 2018- JULY 1, 2018

During the month of June, 3,970 new registrations occurred. 1,487 registrants were removed from the registry. Figure 1 highlights the overall activity in the registry during the month of June 2018.

PROVINCIAL OVERVIEW – TOTAL VOLUMES OF REGISTRANTS NOT YET PLACED

There were 52,507 registrants not yet placed with a family practice as of July 1, 2018.

Figure 2 depicts the total number of registrants not yet placed by zone as a percent of the total Nova Scotia population, based on 2011 Census data

The Nova Scotia Health Authority (NSHA) is divided into four management zones, which includes:

- Central Zone - Halifax Regional Municipality, Eastern Shore and West Hants Areas
- Eastern Zone - Cape Breton, Antigonish and Guysborough Areas
- Northern Zone - Colchester, Cumberland, and Pictou County Areas
- Western Zone - Annapolis Valley, South West, and South Shore Areas

Each of the zones includes a number of smaller geographic areas, called community health networks, which are used to support health care planning by the NSHA, the Department of Health and Wellness, and the health research community. The networks closely align with county boundaries. Together these cover all areas of Nova Scotia.

The table below gives a detailed geographical breakdown of the volume of registrants not yet placed by zone and community health network and as a percent of the corresponding Nova Scotia population (Table 1). A small number of people may be listed as “unknown.” These may be registrants, for example, whose complete address information was not available. These are updated as new information is received.

Figure 2: Total Registrants Not Yet Placed by Zone

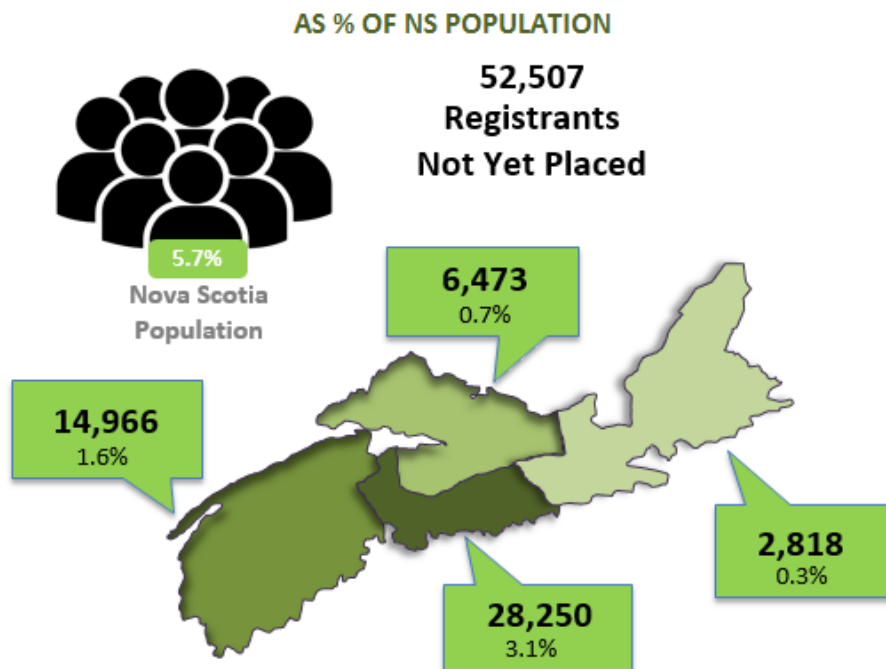

Table 1: Volumes Not Yet Placed by Zone and Community Health Network and as a Percent of the Population by Zone and Community Health Network

Zone/Community Health Network	Total # Not Yet Placed	Population by Zone, Network (2011)	% of Population by Zone, Network (2011)
Central	28,250	409,706	6.9%
Bedford / Sackville	4,965	87,838	5.7%
Dartmouth / Southeastern	9,582	115,427	8.3%
Eastern Shore Musquodoboit	797	18,165	4.4%
Halifax Peninsula / Chebucto	12,135	167,379	7.3%
West Hants	771	20,897	3.7%
Eastern	2,818	163,450	1.7%
Antigonish and Guysborough	285	27,548	1.0%
Cape Breton County	1,856	102,397	1.8%
Inverness / Victoria / Richmond	677	33,505	2.0%
Northern	6,473	150,409	4.3%
Colchester East Hants	3,313	69,991	4.7%
Cumberland	884	34,750	2.5%
Pictou County	2,273	45,668	5.0%
Unknown	3	-	0.0%
Western	14,966	196,284	7.6%
Annapolis and Kings	7,372	78,507	9.4%
Queens and Lunenburg	4,210	59,384	7.1%
Yarmouth / Shelburne /Digby	3,384	58,393	5.8%
Total # Not Yet Placed	52,507	919,849	5.7%

PROVINCIAL OVERVIEW: FOUND A PRIMARY CARE PROVIDER

OVERALL PROVINCIAL VOLUMES

Since the launch of the registry, there were 16,532 registrants who found a provider as tracked via the registry. Of these registrants:

- 8,551 were accepted as new patients by primary care providers who requested and received a list of patient names through the NFP registry.
- 7,981 indicated they had found a primary care provider when contacted or when updating their information in the registry.

These individuals have been accepted into a family practice and are no longer on the registry.

The total volumes of those who found a primary care provider in each zone (Figure 3) are:

- Central Zone: 6,374
- Eastern Zone: 5,855
- Northern Zone: 2,027
- Western Zone: 2,276
