

Aberdeen Hospital

The Aberdeen Hospital is a regional acute care facility serving residents of Pictou County and northern Nova Scotia, offering primary and secondary services through inpatient, outpatient and community-based services and programs. The Emergency Department at the Aberdeen Hospital underwent an extensive redevelopment five years ago to improve the emergency care experience for the team and patients. The new Northern Zone Orthopedic Assessment Clinic opened in November 2020 as part of Nova Scotia Health's Hip and Knee Action Plan to help patients with hip and/or knee arthritis better manage their pain and increase their quality of life.

Located in New Glasgow, Nova Scotia, the Aberdeen Hospital has 1280 staff and 64 physicians.
