# 24-Hour Urine Collection

## Pathology and Laboratory Medicine Halifax Area

Each requisition must have:

- › Your **full name and date of birth**
- › Your **health card number**
- › Your **primary health care provider's (family doctor or nurse practitioner) full name and address**
- › **Start and end times and dates** for each urine collection

## Instructions

- Your primary health care provider has given you a form to have this test done. This form is called a **requisition**. You will need to keep your requisition and **bring it to the drop-off site with your full collection bottle(s)**.
- Start when you have **2 days in a row** that are routine (you plan to get up at the same time and have no special commitments).
- When you get up, urinate (pee) as usual. **Do not** collect this specimen (sample). This is your start time.
- If you miss any urine over the 24-hour period, **you must start a new 24-hour collection**.
- Use only the collection bottle(s) given to you by your primary health care provider, local lab, or blood collection clinic.
- Keep the bottle **in the fridge** between collections and after the last collection.

- Bring the filled bottle(s) to an approved drop-off site **as soon as you finish** your collection(s) (see the link on the back cover for sites).

### DAY 1

- Write your **full name and date of birth, health card number, and the start time and date** on the bottle label and requisition.
- When you get up, **urinate as usual. Do not collect this specimen**. This is your start time.
- Collect **ALL** your urine from that day and night in the same bottle.

### DAY 2

- Get up at the same time as on DAY 1.
- Collect your 1<sup>st</sup> morning urine and add it to the bottle. This is your end time.
- Write your **end time and date** on the bottle label and requisition.

If you need to do 2 back-to-back 24-hour urine collections:

### DAY 2 (continued)

- Write your **full name and date of birth, health card number, and the start time and start date (this is the same as the end time and date on the 1<sup>st</sup> bottle)** on the 2<sup>nd</sup> bottle label and requisition.
- The date and time should match the end date and time on your 1<sup>st</sup> bottle.
- Collect **ALL** of your urine in the 2<sup>nd</sup> bottle that day and night.

### DAY 3

- Get up at the same time as on DAY 2. Collect your 1<sup>st</sup> morning urine and add it to the 2<sup>nd</sup> bottle.
- Write your **end time and date** on the bottle label and requisition.
- Make sure the collection bottle(s) is labelled with your **full name and date of birth, health card number, and the start and end times and dates**.
