Sputum Collection

South Shore Regional Hospital

Your collection sample will not be tested if:

- › it is not labelled correctly.
- › your requisition is not filled out.

Instructions

- Your primary health care provider (family doctor or nurse practitioner) has given you a form for this test. This form is called your **requisition**.
- Use **only** the collection bottle given to you by your primary health care provider, local lab, or blood collection clinic.
- Take out your dentures (false teeth), if you wear them.
- Brush your teeth with water only. **Do not** use toothpaste.
- Rinse your mouth and gargle with water. **Do not** use mouthwash.
- Cough up sputum (phlegm) from deep in your chest directly into the bottle.
- **Do not** mix anything from your mouth (like saliva or post-nasal drainage) with the sputum.
- Use a pen that will not smudge to print on the collection bottle. **If lab staff cannot read what you wrote on the bottle label, your collection will not be tested.**

1. Print your **full name and date of birth, health card number, and the collection date and time** on the collection bottle **and** requisition.
2. Bring your collection bottle to a drop-off site **within 2 hours**.
3. If you cannot bring the sample to a drop-off site **within 1 hour**, put it in the fridge. **Do not** put it in the freezer.

If you have been asked to collect a sample and you are having trouble, call your primary health care provider.

Each **requisition** must have:

- › Your **full name and date of birth**
- › Your **health card number**
- › Your **primary health care provider's full name and address**
- › The names of **all antibiotics you are taking**

Please see back cover for drop-off site locations and hours.
