Hip Protectors

Are you at risk for a hip fracture?

What are hip protectors?

- Hip protectors are plastic shields or foam pads used to protect the hip area. They are usually placed in pockets in special underwear, pants, or shorts.
- Many pharmacies and medical suppliers sell hip protectors. If they do not have them, they may be able to order them for you.

HipSaver hip and tailbone protectors

Why do I need hip protectors?

- Hip protectors lower your risk of hip fracture if you fall.
- You may be at a higher risk for a hip fracture if you:
 - › fell in the last year.
 - › have been diagnosed with osteoporosis or have risk factors for osteoporosis. Ask your health care provider about your risk of osteoporosis.
 - › have had a hip or vertebral fracture in the past.
 - › recently started using systemic glucocorticoid medication (like steroids or prednisone).
 - › are taking medication(s) that is known to cause falls.
 - › have trouble doing daily activities.
 - › have vision or movement problems.

Hip fracture

How do I use hip protectors?

- Ask your health care provider what style they recommend.
- Have your health care provider measure you (see Sizes chart on back).
- **Wear your hip protectors at all times.**
- Make sure the padding sits directly over your hip joint.
