24-Hour Urine Collection

Instructions

- Start when you have 2 days in a row that are quite routine (you plan to get up at the same time and have no special commitments).
- Your doctor has given you a form for this test. This form is called your **requisition**.
- Start collection in the morning, with an **empty bladder**.
- If you miss any urine (pee) over the 24-hour period, you must start a new 24-hour collection.
- Use only the collection bottle(s) given to you by your doctor, local lab, or blood collection clinic.
- Keep the bottle **in the fridge** between collections.
- Bring the bottle to an approved drop-off site **as soon as you finish** the 24-hour collection (see back cover for sites).

DAY 1	<p>When you get up, use the washroom as usual. Do not collect this sample. This is your start time.</p> <p>Write your name, the date, your health card number, and the start time on the bottle label and requisition.</p> <p>Collect ALL your urine in the bottle that day and night.</p>
DAY 2	<p>Get up at the same time as on DAY 1.</p> <p>Collect your 1st morning urine and add it to the bottle.</p> <p>Write your end date and end time on the bottle label and requisition.</p>

Each **requisition** must have:

- › Your **full name and date of birth**
- › Your **health card number**
- › Your **doctor's full name and address**
- › **The names of all antibiotics you are taking**
- › The names of **all countries outside of North America that you have visited (or emigrated from) in the past 12 months**
- › **Start and end dates and times for each urine collection**

If you need to do a second 24-hour urine collection:

DAY 2 cont.	Write your name, the date, your health card number, and the start time on the 2nd bottle label and requisition. The date and time should match the end date and time on your 1st bottle. Collect ALL your urine in the 2nd bottle that day and night.
DAY 3	Get up at the same time as on DAY 2. Collect your 1st morning urine and add it to the 2nd bottle. Write your end date and end time on the bottle label and requisition.

Make sure the collection bottle(s) is labelled with your name, health card number, date(s) of collection, and start and end times.

Take the sample to one of the following Nova Scotia Health Authority Laboratory Services locations:
